moon before yule												15 16 17 18 19 20 21											

winter solstice

vernal equinox

summer solstice

autumn equinox

nature's architecture in a nest sustainable by the gathering through foraging and the ultimate recycling of a single use dwelling, well, almost, but particularly when built in a precarious location. As this nest was. Found on the scaffolding, tucked deeply into the limestone piles that were waiting to be clad on a new-build human dwelling. The Pied Wagtails that built this nest did not fare well, the stone mason worked around the nest until it was no longer occupied, however, that was sooner than anticipated and the broken egg shells found told the story of wild theft by a larger predator.

celebrating the cycles of life pagan holidays are recognised in different ways as they are considered to be earth-based. While I avoid religious references I do acknowledge the spirit-of life.

winter
yule - 21st december, winter solstice
imbolc - 1st february, spring begins
spring
ostara - 21st march, spring equinox
beltane - 1st may, may day
summer
litha - 21st june, summer solstice
lughnasadh - 1st august, first harvest
loo'na'sah, lammass

autumn
mabon - 21st september, autumn equinox
samhain - 1st november, final harvest
sah'win
